Work Experience & Projects

Geekstart Company Ltd. — Frontend Developer Intern

January 2026 – May 2026

- Built React.js features for One Call & Insight web apps
- Form systems with React Hook Form + Yup validation
- REST API integration with Axios & SWR data caching
- Full codebase refactor & Dead Code Elimination
- Implemented reusable component architecture using Decorator Pattern, PropTypes, and shared layouts
- Added multilingual support (i18n) for Thai/English interfaces

Personal Project

Reading Journal

Full-stack web app for book lovers to track reading & connect with others.

- Reading journal with chapter tracking, and progress stats.
- Community features: reviews, ratings, and social sharing.
- Admin dashboard for user and content moderation.
- ML recommendation engine (SBERT + cosine similarity) for 10,000+ books.
